

# Time Conversion (seconds to HH:MM:SS)

45 POINTS

Write a program to accept number of seconds from console and print the time in standard format i.e. HH:MM:SS

Input Format

A single line of input containing an integer denoting the number of seconds.

Output Format

A single line of output denoting the time in standard format.

Test Case 1

3661

01:01:01

Explanation:

3661seconds = 61minutes 1second = 1hour 1 minute 1 second

Test Case 2

63

00:01:03

Explanation:

63seconds = 1minute 3second = 0hour 1 minute 3 second

NOTE:

# Please follow the output instructions strictly. You might want to format the output before printing.

# For C language use %02d instead of %d for printing integers.
